Mark

I am going to keep one of my contractors around for my eyes and ears over the weekend as I move over to ITC. I need to receive daily updates on activities completed and plans for the next day.

Everyone is aware of the weather system coming in on Saturday so you need to insure you guys are ready to contain contaminated/commingled stormwater.

If the meeting schedule changes, please let me know. I understand that there is going to be one meeting at 8 am.

My contact information is below:
